linkedin BI portfolio

Summary

Senior BI Developer with 12+ years of experience in Business Intelligence (Power BI, Tableau, IBM Cognos Analytics). Strong background in data visualization and UX, SQL optimization, data modeling and stakeholder communication. Experienced in pre-sales, team leadership, mentoring and public speaking (meetups, corporate courses). Author of articles for corporate websites and LinkedIn who brought the company major clients. Recognized with honor rolls and a Certificate of Honor for work achievements. Winner of International Data Visualization Contests.

Skills

BI & ETL
Microsoft Power BI, Tableau, IBM Cognos Analytics, Looker, Yandex DataLens, Fastboard, AW BI, PIX BI, Visiology, Redash, POPSQL, Metabase, Superset

Programming & Databases
SQL, DAX, Power Query (M), Python, JavaScript, HTML, CSS, DB2, PostgreSQL, MySQL, Snowflake

Other
AI tools, Jira, Confluence, Figma, Git, MS Office

Professional Experience

Lead BI Developer, *EffectiveSoft*
09/2022 – Present

Head of BI direction in the Data Department (5 empl.). Managed team workload, hiring, and performance reviews. Led pre-sales activities (tech stack selection, architecture documentation, dashboard prototypes).

Senior BI Developer
- Defined and implemented BI development standards, best practices, and reusable templates across the department, reducing time-to-market for new dashboards.
- Designed and built a comprehensive Power BI ecosystem for Executive, IT, HR, Operational & Financial reporting. Translated complex business requirements into scalable data marts and actionable insights. Automated refresh schedules for "morning-ready" dashboards.
- Acted as the primary technical point of contact for C-level executives and business stakeholders, translating strategic goals into technical roadmaps and prioritizing the BI backlog.
- Developed custom interactive visuals (HTML/SVG) and DAX measures for clinical trial matching and internal dashboards usibg UI/UX best practices.
- Optimized SQL, built Power Query (M) pipelines, and integrated disparate data sources.
- Conducted internal/external meetups, wrote articles, and mentored interns.
- *Stack: Power BI, DAX, Power Query, SQL, PostgreSQL, Snowflake, Figma, Jira, Confluence.*

Achievements:
- Contributed to pre-sales activities that resulted in 4 new big clients for the Data Department.
- Implemented dynamic RLS for 50+ users, ensuring secure segregation without multiplying reports.
- Designed and delivered an original 45-hour online course on data visualization (*Power BI)* and mentored interns, 6 of whom were subsequently hired for projects.
- Healthcare Impact: Delivered interactive reporting for a US-based AI-driven oncology platform, matching patients with clinical trials. Aligned technical solutions with clinical workflows and ensured compliance with healthcare data requirements.

Senior BI Developer, *IBA Group*
02/2014 – 07/2022

- Delivered BI solutions for clients from various domains in the USA (Software Distribution), Europe (Healthcare), and Belarus (Banking & Finance).
- Defined and implemented BI development standards, UI/UX best practices, and reusable templates across projects. Analyzed customer needs and IBM solution architectures; built framework models from specs.
- Built complex Cognos reports and interactive dashboards, explored data using ML techniques.
- Managed the migration and adaptation of SICR reports into Cognos Analytics 11 based on ITIM data. Optimized SQL, tuned report performance, and initiated the migration of Cognos reports to Power BI.
- Defined requirements, planned and supervised team tasks and estimates. Developed documentation, trained team members, managed user groups, and performed internal/acceptance testing.
- *Stack: IBM Cognos Analytics 11/10, Tableau, Power BI, SQL, DB2, JavaScript, R Studio, Salesforce, Jira.*

Achievements:

- Built a corporate data warehouse for Belveb Bank, delivering 15+ data marts and 30+ managerial/statutory reports for the National Bank within the data team.
- Successfully migrated and adapted SICR reports into Cognos Analytics 11 based on ITIM data; initiated the migration of Cognos reports to Power BI (Kyndryl).
- Designed and delivered original online courses for 13 university students (Tableau) and corporate clients (Cognos for 25+ ForteBank empl.). Prepared students for Tableau certification - 5 successful exam passes.
- Implemented BI development standards and reusable templates across projects, reducing development time and ensuring consistency.
- Acted as the primary technical point of contact for IBM clients, translating business requirements into technical roadmaps and prioritizing the reporting backlog.

Analyst-Economist, *Media Holding "Vladimir Grevtsov's Agency"*
03/2013 – 11/2013
Plan-to-fact analysis (P&L), economic reports, monthly reporting, outlier analysis in 1C.

Education

Mathematical Methods in Economics, *Belarusian State University*
Faculty of Mathematics and Mechanics, 2009-2014 Minsk, Belarus

Certifications

Tableau Desktop Certified Associate, *2020*

IBM Cognos Analytics Author V11 C2090-621, *2020*

IBM Cognos 10 BI Metadata Models COG-632, *2015*

IBM Cognos 10 BI Author COG-612, *2014*

Awards

Certificates of honor for work achievement • **PIX BI Dashboard Contest (1st place)** — 2026 • **AW BI Dashboard Contest (2nd place)** — 2025 • **Yandex DataLens Festivals (Top-5)** • **Fastboard Dashboard Contest (Grand Prix)** — 2025
